

SajiloMart — Git Workflow Guide

For Each Team Member

One-Time Setup (Do this only once)

1. Configure Git

Windows:

```
bash
git config --global user.name "Your Full Name"
git config --global user.email "your@email.com"
git config --global core.autocrlf true
```

Mac:

```
bash
git config --global user.name "Your Full Name"
git config --global user.email "your@email.com"
git config --global core.autocrlf input
```

2. Clone the Repo

```
bash
git clone https://github.com/SajiloMart/SajiloMart.git
cd SajiloMart
```

When prompted:

- **Username:** your GitHub username
- **Password:** your GitHub Personal Access Token (not your password)

3. Switch to Your Branch

```
bash
git fetch --all
git checkout feature/your-branch
```

Name	Branch
Saroj	git checkout feature/saroj-backend
Tsering	git checkout feature/tsering-backend
Bhupendra	git checkout feature/bhupendra-frontend
Shreyas	git checkout feature/shreyas-frontend
Binit	git checkout feature/binit-database

Name	Branch
Sanjaya	git checkout feature/user-vendor-resources

4. Set Up the Project

```
bash
cp .env.example .env
composer install
php artisan key:generate
php artisan migrate --seed
npm install && npm run build
```

17 Daily Workflow (Do this every day)

Starting Work — Pull Latest Changes

```
bash
# Always start by pulling your branch
git checkout feature/your-branch
git pull origin feature/your-branch
```

While Working — Save Progress

```
bash
# Check what files you changed
git status

# Add your changes
git add .

# Commit with a clear message
git commit -m "feat: describe what you did"
```

Ending Work — Push to GitHub

```
bash
git push origin feature/your-branch
```

Commit Message Format

Always write clear commit messages:

```
feat: add product card component
fix: correct login redirect issue
chore: update tailwind config
style: format auth pages
```

⚠️ Golden Rules — NEVER BREAK THESE

- ❌ Never push directly to main
 - ❌ Never run: `git push origin main`
 - ❌ Never run: `git push --force`
 - ✅ Always work on your own branch
 - ✅ Always pull before starting work
 - ✅ Always commit before ending work
-

🆘 Common Issues & Fixes

"Your branch is behind"

bash
`git pull origin feature/your-branch`

"Merge conflict" — call Sanjaya immediately, don't try to fix alone.

"I accidentally edited the wrong file"

bash
`git checkout -- filename.php`

"I want to undo my last commit"

bash
`git reset --soft HEAD~1`

✅ Daily Checklist

- ☐ Pull latest code before starting
- ☐ Work only on your assigned branch
- ☐ Commit every time you finish a feature/fix
- ☐ Push before ending your session
- ☐ Never touch main
